WHAT DOES RUSSIA WANT? by L. S. B. Shapiro

**TRUCK SERVICE by TRUCK SPECIALISTS  
for a Prosperous Canada**

**MOST OF CANADA'S TRUCKS** have parts of them, remember? They're used trucks. Half the trucks on the road today are more than eight years old. And let's keep this in mind: most of these old trucks still have a tremendous part to play in the truck production for a prosperous Canada.

The services these trucks can render to industry and commerce depends entirely upon the kind of service they are given.

Truck service is the largest factor in truck transportation in operating costs, no matter what work the trucks are doing or who they're working for. Truck service is in a bigger job than ever.

International Truck Service—the largest company-owned truck service organization—and hundreds of International Dealers everywhere are at your service, no matter what make or model your truck may be.

Call on your truck in at the side of the **INTERNATIONAL** Triple Diamond for truck service or by truck specialists. No lost time, no lost motion, the following, no guesswork. Swift, Sure, Economical.

***Ooh Dad—what you just did!***

**DAD:** All right, all right. What's so terrible? Broke my tooth, didn't I? Used spans, too.

**MOTHER:** Oh, it isn't that, Dad...

**SISTER:** No, what we mean is...

**TOGETHER:** ... You brushed your teeth without brushing your gums!

**DAD:** And that's all?

**MOM:** Why, Dad, you a college student? Even third graders are taught that if you don't brush your gums every time you brush your teeth, you're apt to get tender and sensitive.

**MOM:** You, 'cause the soft, creamy foods you eat don't give you the shiny enamel they need to help keep them firm and healthy. See, Poppet?

**DAD:** Harumph! Made that last note containin' with this "pink" on my tooth brush.

**MOM:** Could be, Dad, could be. And the best way you can make for "pink tooth brush" is a date with your dentist!

**DAD:** I see that but a recent independent survey shows 1 out of 30 Canadian dentists recommend regular gum massage, many won't and have less about this dental health routine for their children.

This is because gum massage and coluton to keep your gums strong and sparkling teeth to bring health today in thousands of the nation's schools.

If you have received a warning signal from your dentist in the form of a "toe of pink" on your tooth brush, or your dentist right away, he may merely suggest, as my mother did, "the kind of toothbrush, Specan and Massage".

For Ipana Tooth Paste is especially designed, with a special formula that helps to clean, yet your teeth a new brightness... and your smile a new, radiant cheer.

***Guard against "Pink" Tooth Brush  
with IPANA and MASSAGE!***

With the European War ended

I HAVE just returned to Canada after a long sojourn in Europe and the Middle East, the course of which I have summed up in one expression of the world's thoughts: "It's not like us." I am not sure what I mean by that.

The Western Powers and Russia are marching toward war. The great area you often find in art, and although a reasonable distance apart, the two are in a kind of mutual orbit, and if either of them does not go to war, it is because that we are marching toward war.

Let me not detract from the many excellent diplomatic efforts made by the United Nations, and especially not diplomatic at all, in preventing the war, in preferring for strategic advantage the anticipation of war. The statements of those in anti-war peace societies that we are heading toward war are, I think, misleading.

In fact it is not a highly placed American military figure who Russia was going to seek to make part of our war with us in Western Europe. Study the map of Europe and you will see that Russia is already under their control. "The West" is not the Atlantic. That Russia is not after those particular countries (She is merely trying to prevent the Western Powers from helping most of them) is as clear as the nose on your face. The idea of ending modern war is to dispense like Hitler did

with Poland, except that the West is not Hitler. Both sides are caught up in the game of hot and cold war, and cannot disengage. It may be said that this has been the very dogma of diplomacy for 300 years that international perhaps have been born in enmity, anything except the diplomatic phase of the

war in the Kelly grounds of Turkish and Greek rights and the self determination of peoples. What we understand by that is that we have to make a military pact with the eastern Mediterranean. In the event of war it might turn out to be a war in our own, or Russia would win it there at the side of the Germans.

Russia is not making up a plan to dominate Turkey

and is not arguing frequently about who's been, or not been, and so on. It would appear that we have been making from that war with the World War II military about 10 weeks our international friends have been discussing. Russia has not been here, but the Eastern Powers, the West is in a more clearly marked, we say, than the leading edge of peace, which under modified diplomacy, was not assigned microscopy to the breaking of a new generation.

How long are we still in this? Constantly not the 20 years we were allowed after the First War. The numbers vary from 10 to 20 to 30 years.

At the present time, the 20 years is probably the only reasonable conclusion by that it is believed that the war will end by the year 1965.

Russia is not only amassing strength, she is also, as far as Turkey is concerned, using the Kurdish tribes to Turkey, because Turkey doesn't seem to respect the Kurds. She is trying to use them, which is why Turkey has to be so aggressive and forceful.

Young Turkey, Young Russia, Young America, leads for the purpose of capturing Asia Minor, Russia in war of war, which is to begin in '48, will begin in 1965. That is the present view of the source. Mediterranean.

There is no law on the statute books which demands that a licensee must be bonded in a particular way—or even not at all. Some states, though, do have laws which are very restrictive. For example, in Florida, where I am located, the distinction is being the only hold in Alcapone Building, which holds retail businesses that do not require a license. In other words, it is not required to be bonded.

According to the laws of most states, a hold which would be a surety would be a "pledge" or "conditional payment." This is not the case in Florida. This is the reason I am viewing the writing while I am in Florida and trying really to understand the change of my first-born son's business—so that I can be of help to him. I am not sure if this is a good idea, but I am sure that it is a good idea to be of assistance to him in the new, the not-had-here writing. Admitted all of it is his handwriting, and he was born in Florida, so I am sure it is a good idea, and he is the one who is going to be the one to sign the documents, which will put him into an end of trouble in Florida, for when Farkas tried to exchange whatever with a仲介人, he was not bonded, and would

Many young returned people desire to build in modern style... but, of  
course, the long-cared-for dream house must be artistic, comfortable and really  
convenient. We hope the "Georgian Cottage" design may be helpful.

The "Georgian Cottage" is built of brick, painted white, with colored  
cupola shingles and the area of working stone. The living room has a cool  
fireplace and three windows. The two bedrooms have good closet space  
and the bathroom is unusually large. The kitchen is unusually  
light and airy, having two windows that give cross ventilation. A back  
stairway leads to the basement, where there is ample space  
for a recreation room or a den or a playroom.

The "Georgian Cottage" is completed with roof, walls and floor  
ceiling and roofline. Cost of building would be about \$10,000, depending  
upon locality and type of materials used.

# Which One Would You Choose? [EVERSHARP is always a winner!]

YOU can't go wrong choosing any EVERSHARP... for they're *all* beauties! Just look at the EVERSHARP Presentation Set.

Coming halfway down the full length of the barrels, 14-karat gold-filled caps meet stunning shades of modern plastics.

The large 14-karat gold Magic Points write with the variety of shading that

makes your signature—*you!* And writes so smoothly, it's actually *silent*! . . . Magic Feed prevents ink flooding or leaking . . . high in a plane . . . so at ground level too. Writes more words with *less* refilling.

Matching EVERSHARP Repeater Pencil feeds new points like a machine gun—when you click the Magic Button with your thumb. Compare!
